Forward Looking Statements

This presentation contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, as amended, and other securities laws. Words such as “expect,” “will,” “anticipates,” “estimates” and variations of such words and similar future or conditional expressions are intended to identify forward-looking statements. Such forward-looking statements, including statements herein regarding our business opportunities and prospects, strategy, future revenue expectations, licensing initiatives, recent funding and M&A activities as well as our plans to integrate acquired businesses and technologies, are necessarily based upon estimates and assumptions that, while considered reasonable by us and our management, are inherently uncertain. Readers are cautioned not to place undue reliance on these forward-looking statements. Actual results may differ materially from those indicated by these forward-looking statements as a result of various risks and uncertainties including, but not limited to, the following: the risk that we are unable to satisfy all closing conditions in connection with the senior notes issuance described above, and the acquisition of certain assets from CSI; our ability to successfully integrate all IP that we have acquired; risks

regarding our ability to utilize the assets we acquire to successfully grow our market share; risks regarding our ability to open up new revenue streams as a result of the various agreements we have entered into and assets we have acquired; our current liquidity position and the need to obtain additional financing to support ongoing operations; general market, economic and other conditions; our ability to continue as a going concern; our ability to maintain the listing of our common stock on Nasdaq; our ability to manage costs and execute on our operational and budget plans; our ability to achieve our financial goals; the degree to which our licensees implement the licensed technology into their products, if at all; the timeline to any such implementation; risks related to technology innovation and intellectual property, and other risks as more fully described in our filings with the U.S. Securities and Exchange Commission. The information in this presentation is provided only as of the date of this presentation, and we undertake no obligation to update any forward-looking statements contained in this communication based on new information, future events, or otherwise, except as required by law.

Addressing the Data Exchange Challenges of the Future

In today's data-driven world, businesses face mounting challenges related to data security, ownership, and monetization. Datavault AI addresses these challenges by providing a secure, transparent, and scalable solution for managing and monetizing data assets.

Security & Reliability

Businesses struggle with securing and privatizing data assets, especially in the age of AI, where unreliable or unsecured data can undermine entire systems.

Data Ownership

Issues around data ownership, including the lack of a reliable and transparent ecosystem for data exchange.

Audio & Web 3.0 Disconnect

Audio technologies have remained largely disconnected from the emerging Web 3.0 ecosystem.

Data Science Division

Focused on revolutionizing data management, valuation, and monetization in the Web 3.0 era.

Acoustic Science Division

Combines breakthrough audio technologies with data-over-sound innovations, redefining how sound and data interact in the Web 3.0 ecosystem.

Business Model

Datavault AI is **poised for rapid growth** with a **path to profitability**, backed by its innovative technologies, expanding customer base, and scalable revenue model.

POTENTIAL REVENUE STREAMS

Licensing of Data Vault® and Information Data Exchange®

Monetization of AI agents DataVault®, DataScore®, and Data Vault Bank®

Licensing of ADIO® and WiSA® technologies for various industries

POTENTIAL REVENUE DRIVERS

Technology Adoption and Enterprise Contracts

Technology Licensing

PATH TO PROFITABILITY

Strategic partnerships and licensing, along with pending CSI acquisition and additional future, to drive revenue growth in 2026

IBM Partner Plus

As one of IBM's 500 global partners, Datavault AI will leverage IBM watsonx™ to enhance its AI agents—Data Vault Bank®, DataScore® and DataValue®—driving the next wave of AI-powered financial modeling and tokenization.

NYIAX

This partnership will integrate Datavault AI's patented Information Data Exchange® (IDE) and award-winning Data Vault® platform with NYIAX's cutting-edge blockchain exchange technology.

IBM Partner Plus

The IBM Partner Plus program helps businesses access leading technology for growth.

Datavault AI's inclusion drives adoption of AI-driven data valuation and licensing across industries, positioning it as a leader in AI-driven financial modeling.

AI-powered data assets projected to become the next trillion-dollar market.

Datavault AI has developed a fully integrated AI-powered ecosystem that enables organizations to monetize their data assets through its three flagship AI agents

- 1 Data Vault Bank®**
A Web 3.0-powered AI engine that converts enterprise data into structured, tradable assets.
- 2 DataScore®**
A patented AI-driven scoring and risk analysis tool that assess data quality and ensures compliance with GDPR, CCPA, and other regulatory standards.
- 3 DataValue®**
A patented AI-driven pricing engine that assigns real-world financial valuations to enterprise data, creating new liquidity and trading opportunities.

By integrating these AI agents with IBM watsonx, Datavault AI will enable enterprises to harness AI-powered data valuation without the risks of regulatory scrutiny or privacy violations.

Datavault AI will leverage IBM's synthetic data generation technology, allowing clients to train AI models without exposing sensitive customer data—a key advantage for industries with strict privacy requirements.

NYIAX is a pioneer in transparent trading technology built on the **Nasdaq financial framework**.

This partnership will integrate Datavault AI's patented Information Data Exchange® (IDE) and award-winning Data Vault® platform with NYIAX's blockchain exchange technology.

The collaboration will enable businesses to scale, list, price, and trade data and digital assets efficiently, creating new revenue opportunities.

This partnership positions us to capture a share of the projected **\$700 billion data monetization market in 2025***

We furthered this strategic relationship in a licensing agreement with NYIAX that integrates Datavault AI's ADIO® technology into NYIAX's cutting-edge advertising exchange, creating one of the world's first fully functional ultrasonic advertising platforms.
