Overview

We believe that the future of audio technology is in wireless devices and that Summit is well positioned to deliver best-in-class immersive wireless sound technology for intelligent devices and next generation home entertainment systems. According to a report by *Markets and Markets*TM research firm, the wireless audio market is projected to be \$31.80 billion by 2023, making it one of the fastest growing consumer segments. We currently sell modules which wirelessly transmit and receive audio directly to speakers, and which are also fully certified and compatible with the Wireless Speaker and Audio (“WiSA”) Association’s current Compliance Test Specification, which tests the interoperability of products that offer wireless, interference free, uncompressed High-Definition audio. Additionally, we plan to license our proprietary software technology, currently embedded in our wireless modules, to other companies who can then embed our technology into other Wi-Fi enabled smart devices. The segment of the wireless audio market that Summit focuses on is comprised of scalable multichannel solutions with levels of latency that are low enough to synchronize with video. The term multichannel refers to the use of multiple audio tracks to reconstruct a sound field using multiple speakers.

As part of the effort to grow the wireless multichannel home audio segment, Summit was a founding member of the WiSA Association, an association dedicated to providing industry leadership and consumer choice through interoperability testing between brands. There are currently over 65 brands participating in the WiSA Association. Products certified and marked with a WiSA Association logo have been tested to interoperate. This preserves consumer choice by enabling consumers to choose different wireless transmitting products across different brands where audio is decoded with speakers that have the WiSA Association logo displayed. Our marketing strategy focuses on, what we believe, are two emerging wireless audio market needs: better audio quality and lower signal latency. Summit currently sells custom semiconductor chips and wireless modules to a growing list of consumer electronics customers, including major brands in the consumer electronic industry. We believe that a growing adoption of our technology by leaders in this industry will revolutionize the way people experience media content through their mobile devices, televisions (“TVs”), game consoles and personal computers (“PCs”).

Our Business Focus

Our primary business focus is to enable mainstream consumers and audio enthusiasts to experience high quality audio. We intend to continue selling our semiconductors and wireless modules to consumer electronics companies while also increasing our focus on implementing a software licensing business segment.

Industry Background

The wireless audio market is expected to grow from \$16.13 billion in 2016 to \$31.80 billion by 2023 according to a June 2017 report by *Markets and Markets*TM research firm. The primary growth segments for in home entertainment have been “Bluetooth” stereo accessories which include single speakers, headsets, and more recently, “multi-room” stereo speakers that use your home’s Wi-Fi network to stream audio throughout the house. According to a September 2017 article available at www.dealerscope.com, the emergence of the latter component audio system has presented issues in latency and quality among wireless devices, which Summit’s technology aims to fix. The information contained in or accessible through the foregoing website is not part of this prospectus, or the registration statement of which this prospectus forms a part, and is for informational purposes only.

Our Technology

Our technology addresses some of the main issues that we perceive are hindering the growth of the home theater: complexity and cost. We believe that consumers want to experience theater quality surround sound from the comfort of their homes. However, wired home theater systems often require expensive audio-visual (“AV”) receivers to decode the audio stream, leaving the consumer with the burden of concealing the wires. Hiring a professional to hide the wires into the walls or floor is invasive, complicated, costly and time consuming. Further, people that rent as opposed to own may not be able to install these systems as the installation construction needed may not be permitted under a lease agreement. Our first-generation wireless technology addresses these problems by transmitting wireless audio to each speaker at Blu-ray quality (uncompressed 24-bit audio up to 96 kHz sample rates) and emphasizing ease of setup. To our knowledge, Summit’s custom chip and module technology is one of the only technologies available today that can stream up to eight (8) separate wireless audio channels with low latency, removing lip-sync issues between the audio and video sources. In addition, every speaker within a system that utilizes our technology can be synchronized to less than one microsecond, thus eliminating phase distortion between speakers. Summit’s first-generation technology shows that wireless home theater systems are viable home audio solutions for the average consumer and audio enthusiast alike.

Summit is currently developing certain proprietary software for which patent applications have been submitted that we believe will allow us to enable smart devices that have Wi-Fi and video media to deliver surround sound audio. A prototype version of our software technology has been demonstrated to select customers (pursuant to confidentiality agreements) at the 2019 Consumer Electronics Show in Las Vegas, Nevada. We believe that our software based-solution, which other brands can integrate into their devices, will (i) reduce integration costs for mass market use, (ii) utilize Wi-Fi for wireless connectivity, making the need for complex physical wire installations unnecessary, (iii) provide a low power consumption option to allow for use in battery powered devices, and (iv) provide compatibility with popular consumer electronic operating systems.

Additionally, we believe that our software-based solution will have certain advantages compared to our custom chip and modules we currently have available since our current chips and modules require brands to integrate a separate dedicated Summit transmit module even if a Wi-Fi module is included in the design of the device. Our custom chip and module solution may not be appropriate for integrating into certain devices because it adds to system cost, power consumption, and occupies space. We intend to leverage what we have learned from our current products to help us develop a product that can be easily ported to run as software on most Wi-Fi modules and media systems on a chip (“SOC”) combination as opposed to a proprietary wireless audio module. This new approach eliminates the cost of a second radio so there is no additional material cost, assuming there is a Wi-Fi module already integrated into the device.

WiSA Association

Our wholly-owned subsidiary, WiSA, LLC, operates the WiSA Association, which is an association comprised of brands, manufacturers, and influencers within the consumer electronics industry, all of which agree that a standardized method of interoperability between wireless audio components should exist, and most of which believe that products should be brought to market with this goal in mind. The WiSA Association creates, maintains and manages specifications for wireless interoperability that are available to all association members. For products with a WiSA Association certification, the WiSA Association also creates, maintains and manages testing criteria and specifications for all products to be listed, marketed and sold. WiSA-certification is an industrywide “stamp of approval” certifying that a product is interoperable with other products in the WiSA ecosystem and has passed several high-performance tests ensuring interoperability and wireless performance standards are met. As the sole owner of WiSA, LLC, we certify all WiSA Association products. Although we previously did not sell any WiSA-certified products, we plan to sell such products in the near future and we also distribute the technology to enable such products to meet the WiSA Association’s certification test specifications.

In 2018, the Company introduced the WiSA ReadyTM certification. The WiSA Ready certification identifies entertainment sources – such as TVs, gaming systems or computers – that are equipped to deliver up to eight (8) channels of high-definition audio to WiSA-certified speakers when connected with a WiSA Universal Serial Bus (“USB”) transmitter. This program simplifies consumer set-up and reduces costs by replacing AV receivers or wireless hubs with a low-cost USB accessory. We believe that using WiSA Ready products allows consumers to more simply and conveniently enjoy wireless multi-channel sound, eliminating the clutter, wires and complicated installs generally required to create immersive audio experiences.

Currently, WiSA-certified products are required to use Summit modules in order to meet the standards set by the WiSA Association. As a result, WiSA Association members purchase modules from us in order to build their products to meet such standards.

Among WiSA-certified products, consumers will be able to outfit their home entertainment system with WiSA-certified speakers and components from any participating vendor with the assurance that the devices will interoperate and provide high quality wireless High-Definition surround sound.

The WiSA Association manages logo usage and trademark guidelines, investigates alternative markets, connects brands to manufacturing resources, and provides industry leadership in solving the challenges facing the home theater and commercial markets in the integration of wireless audio technology.

Modules

Summit has designed wireless modules that provide high performance wireless audio for our customers to build into their products, such as a speaker, TV, or Summit's WiSA Ready USB transmitter dongle. These modules include our custom semiconductors with our intellectual property ("IP") built in as well as a Wi-Fi radio for communications. By designing and selling these modules, we can reduce our customers' design expense, accelerate their time-to-market cycle, and reduce the cost of each module. Summit offers both a "TX" module to transmit the audio from a host device like a media hub, TV or dongle to WiSA-enabled speakers and an "RX" model for speakers that receive the wireless audio signal and processes it for audio play out.

Modules for Consumer Products

Summit's TX modules are targeted for integration into TVs, AV receivers, media hubs and small USB dongles. Summit's transmitter, with its integrated antenna, is designed to support rooms as large as 10-meters by 10-meters with uncompressed, 24-bit audio up to 96 kHz sample rate. The module supports a simple interface, with Inter-IC Sound ("I2S") or USB audio and control. In addition, Summit's technology has been approved by Digital Content Protection, LLC, the licensing agency for High-bandwidth Digital Content Protection, as an audio only output technology for retransmission of audio content.

Summit's receiver interfaces to a digital amplifier and is designed to be integrated directly into a home theater speaker. Integrated antennas support 24-bit audio up to 96 kHz sample rates virtually anywhere within a 10-meter by 10-meter space. It supports one or two separate audio outputs via I2S. An optional interface on the receiver module can be enabled to configure the speaker type and provide volume/mute control at the speaker. Alternatively, the speaker type can be assigned at the factory for preconfigured Home Theater in a Box applications.

Summit Speaker Systems

There are speaker systems utilizing Summit's technology currently in the market with a price range of \$500 to over \$80,000. We believe that the technology allows brands and retailers to provide high quality systems to consumers at a multitude of price points. Further, multi-channel systems can be easily expanded, allowing a consumer to start with a basic 2.0 (stereo) or sound-bar system and expand over time.

The Summit Opportunity

We believe that the following attributes: cost, mobility, video support, ease of installation and quality create a market opportunity for Summit's technologies to be adopted by the consumer electronics industry as described further below.

Cost

We believe that the simplicity and cost structure of our current WiSA USB transmitter and upcoming embedded software solution will make our prices competitive for a wider range of applications, allowing consumer electronics companies to integrate our technology, while also delivering high quality audio.

Mobility

Mobile devices are popular for streaming video, gaming and using virtual reality applications. We believe that this is driving a need for an embedded high-fidelity wireless solution in the mobile device that can transmit audio to headsets or speakers within a room. Summit's technology enables high quality wireless audio transmission from mobile devices.

Video Support

Wireless audio capable of supporting video has become a priority for consumers across a variety of high-volume multimedia platforms, including TV's, smartphones, game consoles and set-top boxes. Video applications require audio and video to be perfectly synchronized in order to avoid lip-sync and audio phase distortion issues. Summit's technology prioritizes low latency and synchronization to less than one microsecond, thus practically eliminating phase distortion between speakers.

Ease of Installation

We believe that the home theater market has moved toward simplicity in recent years. The costly and inconvenient home theaters of the past have left consumers with a desire for audio systems that provide a simplified installation process. We believe that new audio systems, including the predominant sound bar system, are unable to provide high levels of performance, especially in the surround-sound market. Summit's technology greatly simplifies the installation process of true surround-sound systems. This allows consumers to install a home theater system with the same amount of effort as a sound bar, but enjoy a far superior experience. An overwhelming majority of the content entering consumers' homes through digital TV and streaming services is provided in a multi-channel format, which is why Summit's goal is to facilitate enjoyment of true surround sound for both the everyday consumer and audio enthusiast.

In addition to easy installation, Summit modules provide consumers with a multitude of options, allowing customization of a home theater specific to each consumer, without being forced to stick with one brand of speaker. For example, our hope is that a consumer might start with a Summit enabled sound bar for their TV and then add a Summit enabled subwoofer. That same system can be easily upgraded to a variety of surround sound systems by simply adding more speakers. Our technology will allow consumers to upgrade an audio system or just one component of the system without the need to replace the entire system. Consumers can keep the original transmitter, sound bar, and subwoofer and integrate them seamlessly into a new system. Being able to outfit a home entertainment system with Summit-enabled speakers and components gives consumers the ability to express their individual preference and needs and provides the assurance that the devices will interoperate, delivering the highest standard in high-definition ("HD") wireless surround sound.

Dissatisfaction with Bluetooth Performance and Quality

We believe that consumers want better performance and quality from their Bluetooth audio devices. For example, they may want headsets that stay connected over longer distances or products that offer better audio fidelity. By offering a solution that addresses these needs at a comparable price point to Bluetooth, we believe that we can build consumer demand for our technology.

Profitability of Audio Component Accessories

High-definition televisions ("HDTVs") are getting thinner and it is becoming increasingly difficult to incorporate the latest electronic advances into such thin displays. We expect that eventually most of the electronics will be external to the display. We believe that the first physical feature to be removed from HDTVs will be the audio component, since there is very little room for quality speakers in today's thin displays. We believe that HDTV manufacturers know that they need to provide an audio alternative. Additionally, since cost is a significant consideration, we believe that some manufacturers may offer external sound bars which will satisfy some consumers, but perhaps not the consumers who desire a high-quality audio alternative. We believe that these developments are creating an inflection point in the market, and manufacturers are looking to Summit's technology to create a standard for wireless audio interoperability that will support a long-term product strategy for the successful development of high quality, wireless audio products. By designing speaker systems that incorporate Summit's technology, consumer electronics companies will be able to sell easy-to-install surround sound audio solutions alongside TVs.

Enjoyment of improved audio on existing content

We believe that the growth in the number of video devices streaming multi-channel audio content, coupled with new 3D immersive sound experiences from Dolby's ATMOS and DTS' DTSx formats, will help propel the demand for wireless speakers well into the future.

Enjoyment of wireless audio without interference from other wireless signals

Having other devices nearby that also use the 5 GHz band should not affect the performance of a Summit-enabled audio system, as Summit's technology can seamlessly switch to another frequency within the 5 GHz band. The 5 GHz U-NII spectrum utilized by Summit technology has up to 24 channels available that are constantly monitored for interference using the Dynamic Frequency Selection sub-band between 5.2 and 5.8 GHz. When interference is detected, the next channel, having been monitored for over one minute and confirmed for accessibility, is ready to be accessed and Summit-enabled devices switch seamlessly to that channel, without the user ever noticing or the audio experience being affected.

What Makes Summit Unique

Both the proprietary technology and the adoption of the technology by leaders in consumer electronics are differentiating factors for Summit. Management believes that Summit is the only company with the technical capabilities of transmitting high resolution, low latency, and speaker synchronization of wireless audio capable of supporting up to 8 channels. Premium consumer brands, like Bang & Olufsen, have begun to adopt our technology as a valued feature in performance products.

Category Defining Wireless Audio

Our wireless audio technology delivers 8 channels of uncompressed audio directly to the speakers in 24-bit and up to 96 kHz sample rates. This means that a consumer can experience audio exactly as it was mastered in the studio. Summit's technology supports surround sound systems up to 7.1 or 5.1.2 for Dolby ATMOS configurations. There are three wireless audio platforms: WiSA, standard Wi-Fi, and Bluetooth. Low latency is critical for home theater and gaming markets. WiSA's latency is a fixed latency less than 10 milliseconds, while standard Wi-Fi and Bluetooth technologies have a variable latency greater than 50 milliseconds. In a multi-speaker environment, speaker synchronization is important for keeping each speaker on the same audio sound bit. WiSA keeps speakers synchronized within 5 microseconds. Wi-Fi and Bluetooth are greater than 50 microseconds. Finally, channel count is critical for multi-channel content. WiSA supports 8 channels, Bluetooth supports up to 2 channels, and standard Wi-Fi supports up to 4 channels.

Summit's technology roadmap includes proprietary software, currently in development, that will support 802.11 Wi-Fi protocol. This proprietary software has been designed to scale in audio channel count and sample rates even as Wi-Fi performance or network utilization changes.

Summit Customers

Summit currently sells custom semiconductor chips and wireless modules to a growing list of consumer electronics customers, including major brands such as Axiim, Bang & Olufsen, Enclave Audio, Klipsch, LG, Harman International, a division of Samsung, and System Audio. We believe that the use of our products by well-known consumer electronics brands will provide an opportunity to create wireless audio products that are simple to install and perform at high levels. Brands such as Bang & Olufsen and Klipsch have chosen Summit technology to drive their wireless home audio/theater product assortments. We believe that their leadership has brought credibility to the technology and paved the way at retail for other brands to follow.

Our Strategy

Our goal is to establish and maintain a leadership position as the ubiquitous standard for hi-fidelity wireless, multi-channel audio. To obtain and enhance our position as the leading standard in the audio space, we intend to:

- improve recognition of our Summit brand and the WiSA Association standard brand;
- provide excellent products and services to our customers and members;
- make sure our technology is accessible to many consumers by having our technology in consumer electronics devices that sell at a variety of price points;
- expand market awareness of wireless multi-channel hi-fidelity audio experience availability;
- reduce hardware costs while moving towards a software licensing business model;
- enhance and protect our IP portfolio;
- invest in highly qualified personnel; and
- build innovative products alongside the world's leading consumer electronics companies.

We currently sell our modules in relatively small quantities. As new customers introduce Summit-enabled products and current customers introduce second and third generation Summit-enabled products, we expect that orders for our modules will increase proportionally. With larger orders, we believe that we can take advantage of economies of scale and improve our gross margins on our modules.

Interoperability

Interoperability is a key aspect of wireless technology. We believe that this is especially true in audio, where unique designs, price points, audio quality and capabilities as well as consumer brand loyalties are significant factors for the end consumer. Creating home theater and audio components that all work with an interoperable standard creates a high level of confidence in retailers and consumers and helps drive the entire category. Interoperability also increases the opportunity for specialized brands to create new and innovative products knowing they can focus on their specific part of the market and rely on others to create the necessary cohort components.

Proprietary Software

A significant amount of our time and resources are being allocated towards launching a software licensing part of our business. Customers will receive a license for our TX software, so that any of their devices with a suitable Wi-Fi radio can transmit audio compliant with our standard without having to purchase and integrate our TX module. We believe that this software will be well-positioned for use by major consumer electronics companies in many devices including TVs, handsets, gaming consoles, and computers. We have submitted patent applications for key technology innovations in this software.

Speaker companies under this new model would purchase Wi-Fi modules with our RX software pre-installed from an original equipment manufacturer ("OEM"), rather than buying modules directly from us. The OEM would pay a royalty to us based on how many modules with our software that it sold.

Implications of Being an Emerging Growth Company

We are an “emerging growth company” as defined in the Jumpstart Our Business Startups Act of 2012 (the “JOBS Act”). For as long as we are an emerging growth company, unlike public companies that are not emerging growth companies under the JOBS Act, we will not be required to:

- provide an auditor’s attestation report on management’s assessment of the effectiveness of our system of internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act of 2002 (the “Sarbanes Oxley Act”);
- provide more than two years of audited financial statements and related management’s discussion and analysis of financial condition and results of operations;
- comply with any new requirements adopted by the Public Company Accounting Oversight Board (the “PCAOB”) requiring mandatory audit firm rotation or a supplement to the auditor’s report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer;
- provide certain disclosure regarding executive compensation required of larger public companies or hold stockholder advisory votes on the executive compensation required by the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”); or
- obtain stockholder approval of any golden parachute payments not previously approved.

We will cease to be an emerging growth company upon the earliest of the:

- last day of the fiscal year in which we have \$1.07 billion or more in annual revenues;
- date on which we become a “large accelerated filer” (the fiscal year-end on which the total market value of our common equity securities held by non-affiliates is \$700 million or more as of June 30);
- date on which we issue more than \$1.0 billion of non-convertible debt over a three-year period; or
- last day of the fiscal year following the fifth anniversary of our initial public offering (“IPO”).

In addition, Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards, and we have elected to take advantage of such extended transition period for complying with new or revised accounting standards.

We have elected to adopt certain of the reduced disclosure requirements available to emerging growth companies. As a result of these elections, the information that we provide in this prospectus may be different than the information you may receive from other public companies in which you hold equity interests. In addition, it is possible that some investors will find our common stock less attractive as a result of these elections, which may result in a less active trading market for our common stock and higher volatility in our stock price.

SELLING STOCKHOLDERS

The table below lists the Selling Stockholders and other information regarding the “beneficial ownership” of the shares of Common Stock by the Selling Stockholders. In accordance with Rule 13d-3 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), “beneficial ownership” includes any shares of Common Stock as to which the Selling Stockholders have sole or shared voting power or investment power and any shares of Common Stock that the Selling Stockholders have the right to acquire within sixty (60) days (including shares of Common Stock issuable upon exercise of warrants to purchase shares of Common Stock that are currently exercisable or exercisable within sixty (60) days).

The second column indicates the number of shares of Common Stock beneficially owned by the Selling Stockholders, based on their respective ownership as of December 2, 2019. The second column also assumes the exercise of all of the Warrants, including the Pre-Funded Warrants, held by the Selling Stockholders as of December 2, 2019, without regard to any limitations on exercise described in this prospectus or in the Warrants.

The third column lists the shares of Common Stock being offered by this prospectus by the Selling Stockholders.

This prospectus covers the resale of all of the Shares as well as all of the shares of Common Stock issuable upon exercise of the Warrants, including the Pre-Funded Warrants, that are held by the Selling Stockholders. The Selling Stockholders can offer all, some or none of their shares of Common Stock, thus we have no way of determining the number of shares of Common Stock or the shares of Common Stock underlying Warrants that will be held after this offering. Therefore, the fourth and fifth columns assume that the Selling Stockholders will sell all of the Shares as well as all of the shares of Common Stock issuable upon exercise of the Warrants which are covered by this prospectus. See “Plan of Distribution.”

Material Relationships with Selling Stockholders

We have had the following material relationships with the Selling Stockholders in the last three (3) years:

Warrant Amendment and Exercise Agreements

The Selling Stockholders listed in the Selling Stockholder table above were each party to a Warrant Amendment and Exercise Agreement with the Company (a “Warrant Amendment Agreement”), pursuant to which the Company agreed to reduce the exercise price of such Selling Stockholder’s original warrants of the Company (the “Original Warrants”) to \$0.80 per share (the “Reduced Exercise Price”), and for each Original Warrant exercised by such Selling Stockholder at the Reduced Exercise Price to purchase shares of Common Stock, the Company agreed to reduce the exercise price of Original Warrants to purchase an equivalent number of shares of Common Stock to \$0.79 (the “Amended Exercise Price”).

Pursuant to the Warrant Amendment Agreement and in consideration for the exercise by such Selling Stockholders of any of their Original Warrants at the Reduced Exercise Price, the Company agreed to reduce the exercise price of (i) a subset of Original Warrants, including the Series D Warrants, held by certain of the Selling Stockholders from \$5.40 per share to the Reduced Exercise Price, (ii) the Series F Warrants held by certain of the Selling Stockholders from \$3.60 per share to the Reduced Exercise Price and (iii) the Series G Warrants held by certain of the Selling Stockholders from \$3.00 to the Reduced Exercise Price.

In connection with the Warrant Amendment Agreement entered into with the holders of the Series F Warrants, the Company also executed Amendment No. 1 to the Series F Warrants held by the Medalist Funds (the “Series F Warrant Amendment”), pursuant to which each such Series F Warrant was further amended to add, among other things, fundamental transaction and subsequent rights offerings provisions as well as a 9.99% beneficial ownership limitation (the “Beneficial Ownership Limitation”).

Pursuant to the Warrant Amendment Agreement entered into with each of the Medalist Funds with respect to the Series F Warrants and Series G Warrants, if the exercise of an Original Warrant at the Reduced Exercise Price would cause each of the Medalist Funds to exceed the Beneficial Ownership Limitation, in lieu of receiving such number of shares of Common Stock in excess of the Beneficial Ownership Limitation, the Company will only issue such number of shares of Common Stock to each of the Medalist Funds as would not cause each of the Medalist Funds to exceed the maximum number of shares of Common Stock permitted under the Beneficial Ownership Limitation, and each of the Medalist Funds shall be issued, at an exercise price equal to the Reduced Exercise Price less \$0.79 per share, Pre-Funded Warrants covering such number of shares of Common Stock as would otherwise have been in excess of the Beneficial Ownership Limitation. In connection with such exercises, the Medalist Funds were issued Pre-Funded Warrants to purchase an aggregate of 414,364 shares of Common Stock.

We are filing the registration statement of which this prospectus forms a part pursuant to the provisions of each Warrant Amendment Agreement, in which we agreed to prepare and file with the SEC, as soon as practicable, but in no event later than November 4, 2019 (as amended by the Settlement Agreements (as defined below) to November 18, 2019), a registration statement on Form S-3 to register all shares of Common Stock issued to the Selling Stockholders upon exercise of their Warrants in connection with the Warrant Amendment Agreements, as well as all shares of Common Stock underlying all Warrants, including all Pre-Funded Warrants, as applicable, held by the Selling Stockholders.

From November 3, 2019 to November 6, 2019, the Company entered into settlement agreements (the “Settlement Agreements”) with (i) each of the Selling Stockholders, other than the Medalist Funds, pursuant to which it agreed to issue such Selling Stockholders an aggregate of 152,944 additional shares of Common Stock, and (ii) the Medalist Funds, pursuant to which it agreed to pay the Medalist Funds an aggregate of \$47,223 in cash, with such shares and cash meant to compensate such Selling Stockholders for the difference between the Amended Exercise price and the lower priced shares that were offered to investors in connection with the Registered Direct Offering (as defined below). In addition, pursuant to the Settlement Agreements, the Company and the Selling Stockholders agreed to extend the date by which the Company would file a registration statement on Form S-3 to register all shares of Common Stock issued to the Selling Stockholders upon exercise of their Warrants in connection with the Warrant Amendment Agreements, as well as all shares of Common Stock underlying all Warrants, including all Pre-Funded Warrants, as applicable, held by the Selling Stockholders from November 4, 2019 to November 18, 2019.

Mr. Williams was reimbursed for such payment in December 2017. In addition, as a participant in the Series D Notes financing, Mr. Williams was issued a Series D Note, which converted into shares of Common Stock in connection with the IPO.

In addition, in October 2019, Mr. Williams entered into a Warrant Amendment Agreement with the Company, as described above, pursuant to which such warrant was repriced at \$0.80 per share and then exercised for 3,578 shares of Common Stock. Mr. Williams is the holder of the Other Warrant, which is exercisable at \$0.79 per share.

USE OF PROCEEDS

The Selling Stockholders will receive all of the proceeds from the sale of shares of Common Stock under this prospectus. We will not receive any proceeds from these sales. To the extent that we receive proceeds from the exercise of Warrants other than the Pre-Funded Warrants held by the Selling Stockholders at \$0.79 per share, and proceeds from the exercise of Pre-Funded Warrants held by the Medalist Funds at \$0.01 per share, we will use those proceeds to repay the expenses of this offering, and for working capital and other general corporate purposes. The Selling Stockholders will pay any agent's commissions and expenses they incur for brokerage, accounting, tax or legal services or any other expenses that they incur in disposing of the shares of Common Stock. We will bear all other costs, fees and expenses incurred in effecting the registration of the shares of Common Stock covered by this prospectus and any prospectus supplement. These may include, without limitation, all registration and filing fees, SEC filing fees and expenses of compliance with state securities or "blue sky" laws.

See "Plan of Distribution" elsewhere in this prospectus for more information.

PLAN OF DISTRIBUTION

The Selling Stockholders and any of their respective pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their securities covered hereby on any trading market, stock exchange or other trading facility on which the securities are traded or in private transactions. These sales may be at fixed or negotiated prices. The Selling Stockholders may use any one or more of the following methods when selling securities:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the securities as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- settlement of short sales;
- in transactions through broker-dealers that agree with the Selling Stockholders to sell a specified number of such securities at a stipulated price per security;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- a combination of any such methods of sale; or
- any other method permitted pursuant to applicable law.

The Selling Stockholders may also sell securities under Rule 144 under the Securities Act, if available, rather than under this prospectus.

Broker-dealers engaged by the Selling Stockholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the Selling Stockholders (or, if any broker-dealer acts as agent for the purchaser of securities, from the purchaser) in amounts to be negotiated, but, except as set forth in a supplement to this prospectus, in the case of an agency transaction not in excess of a customary brokerage commission in compliance with FINRA Rule 2440; and in the case of a principal transaction a markup or markdown in compliance with FINRA IM-2440.

In connection with the sale of the securities covered hereby, the Selling Stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the securities in the course of hedging the positions they assume. The Selling Stockholders may also sell securities short and deliver these securities to close out their short positions, or loan or pledge the securities to broker-dealers that in turn may sell these securities. The Selling Stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or create one or more derivative securities which require the delivery to such broker-dealer or other financial institution of securities offered by this prospectus, which securities such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The Selling Stockholders and any broker-dealers or agents that are involved in selling the securities may be deemed to be “underwriters” within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the securities purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. We have requested that each Selling Stockholder inform us that it does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the securities. We will pay certain fees and expenses incurred by us incident to the registration of the securities.

Because the Selling Stockholders may be deemed to be an “underwriter” within the meaning of the Securities Act, they will be subject to the prospectus delivery requirements of the Securities Act, including Rule 172 thereunder. In addition, any securities covered by this prospectus which qualify for sale pursuant to Rule 144 under the Securities Act may be sold under Rule 144 rather than under this prospectus. We have requested that each Selling Stockholder confirm that there is no underwriter or coordinating broker acting in connection with the proposed sale of the resale securities by the Selling Stockholder.

We intend to keep this prospectus effective until the earlier of (i) the date on which the securities may be resold by the Selling Stockholders without registration and without regard to any volume or manner-of-sale limitations by reason of Rule 144, without the requirement for us to be in compliance with the current public information requirement under Rule 144 under the Securities Act or any other rule of similar effect or (ii) all of the securities have been sold pursuant to this prospectus or Rule 144 under the Securities Act or any other rule of similar effect. The resale securities will be sold only through registered or licensed brokers or dealers if required under applicable state securities laws. In addition, in certain states, the resale securities covered hereby may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available and is complied with.

Under applicable rules and regulations under the Exchange Act, any person engaged in the distribution of the resale securities may not simultaneously engage in market making activities with respect to the Common Stock for the applicable restricted period, as defined in Regulation M, prior to the commencement of the distribution. In addition, the Selling Stockholders will be subject to applicable provisions of the Exchange Act and the rules and regulations thereunder, including Regulation M, which may limit the timing of purchases and sales of the Common Stock by the Selling Stockholders or any other person. We will make copies of this prospectus available to the Selling Stockholders and have informed the Selling Stockholders of the need to deliver a copy of this prospectus to each purchaser at or prior to the time of the sale (including by compliance with Rule 172 under the Securities Act).

**DISCLOSURE OF COMMISSION POSITION ON INDEMNIFICATION
FOR SECURITIES ACT LIABILITY**

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling the registrant pursuant to the foregoing provisions, the registrant has been informed that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

LEGAL MATTERS

The validity of the issuance of the securities offered hereby will be passed upon for us by Sullivan & Worcester LLP of New York, New York. Additional legal matters may be passed upon for us or any underwriters, dealers or agents, by counsel that we will name in the applicable prospectus supplement.
